

EVIDENCE:

A screenshot of the Visual Studio Code interface. The Explorer panel on the left shows a file named 'hello.py'. The main editor area is empty. The integrated terminal at the bottom shows the command `python --version` being executed, with the output `Python 3.10.2`. The terminal's title bar indicates it is running on a Windows system.

1. The terminal showing python --version and its answer.

A screenshot of the Visual Studio Code interface. The Explorer panel on the left shows a file named 'hello.py'. The main editor area displays the code `print("python is, work!g")`. The integrated terminal at the bottom shows the command `python` being executed, with the output `python is, work!g`. The terminal's title bar indicates it is running on a Windows system.

2. VS Code with hello.py open and its output visible in the terminal.

```
Problems Output Debug Console Terminal Ports
